ABOUT

I am passionate about backend microservices, distributed systems, and relational databases, with the achievement of representing Malaysia as a competitor at the 47th WorldSkills Lyon 2024 competition. I am committed to continuously building scalable and efficient backend systems.

WORK EXPERIENCE

Java Backend Engineer

Mar 2025 – Present

Ant International

Contributing to backend development and system optimization in a global fintech environment.

- Maintain and enhance Payment Account SaaS microservice APIs supporting regional e-commerce merchants, including Lazada and Daraz.
- Optimized payment sandbox services to improve performance, scalability and developer testing efficiency, increasing transaction success rate from ~80% to near 100%.
- Enabled real-time refund coupon withdrawals to user bank accounts for the Lazada PH wallet, reducing processing time from T+1 to real-time.
- Designed and developed the backend architecture for an AI-powered browser translation extension used by 1,000+ employees, improving multilingual accessibility and internal productivity.
- Tech Stack: Java, Spring Boot, Redis, MySQL, RabbitMQ

Malaysia WorldSkills Competitor

Jabatan Pembangunan Kemahiran (JPK)

Feb 2023 - Sep 2024

Represented Malaysia in international WorldSkills competitions under the IT Software Solutions for Business category.

- Awarded Medallion for Excellence at WorldSkills Lyon 2024. Won Bronze Medals at WorldSkills ASEAN Singapore 2023 and WorldSkills Asia Abu Dhabi 2023.
- Demonstrated full SDLC execution (requirements analysis, system design, development, testing and deployment) while delivering the software solutions under high-pressure competition environments.
- Tech Stack: .NET Core, MSSQL
- Link: https://results.worldskills.org/results?event=579&offset=10&skill=1680&base_skill=221

PROJECTS

DirectPay Payment Gateway <https://directpay.my/>

Oct 2023 – Sep 2024

Project: <https://directpay.my>

- Developed a 0-to-1 payment middleware platform integrated with FPX for secure and seamless online payment processing.
- Implemented automated transaction inquiry CRON jobs and pending transaction handling to improve payment reliability and operational efficiency.
- Designed scalable backend workflows for payment processing and settlement reconciliation.

People Relationship Information Management (PRiM)

Aug 2021 – Apr 2023

Project: <https://prim.my/derma>

- Developed donation management services supporting 200+ organizations, including schools, NGOs and religious institutions.
- Built school fee payment systems for primary and secondary schools with integrated payment workflows.
- Developed administrative modules and payment workflows for organization management systems.

EDUCATION

Bachelor's Degree in Computer Science (Software Development), Universiti Teknikal Malaysia Melaka (UTeM)

Mar 2023 – Aug 2025, CGPA: 3.93 / 4.00

- Recipient of the Vice Chancellor's Award for top academic performance and outstanding contributions of the course

SKILLS

Skills: Java, Spring Boot, C#, .Net, Laravel, MySQL, MSSQL, NoSQL, Redis, RabbitMQ, Git & GitHub, CI/CD, Alibaba Cloud, Telemetry Tracing, Prometheus, RAG, Claude Skills
